SCO Ministers' Meet

India highlights three pillars of security, connectivity and opps for international trade

Calls for greater co-operation among Shanghai Cooperation Organization (SCO) member states to diversify and strengthen supply chains in strategic and emerging sectors, including agriculture, critical minerals, pharmaceuticals, mfg and electronics

AAT News Service

THE 25th Meeting of Ministers of the Shanghai Cooperation Organization (SCO) Member States Responsible for Foreign Economic and Trade Activities held in Dushanbe, Tajikistan, reviewed ongoing co-operation among SCO member states in the areas of economic and trade activities and exchanged views on measures to further deepen trade and economic co-operation within the SCO framework.

In his intervention on behalf of India, Yashvir Singh, Additional Secretary, Department of Commerce highlighted the significant economic potential of the SCO and the importance of translating this potential into tangible outcomes through increased intra-SCO trade, lower trade costs, resilient supply chains and enhanced connectivity.

Referring to the vision articulated by Prime Minister Narendra Modi at the SCO Summit in Bishkek, India highlighted the three pillars of security, connectivity and opportunity. India underscored their economic significance, particularly in strengthening supply-chain resilience, developing efficient and trusted connectivity, and expanding opportunities for businesses through greater market access.

India emphasised the important role of trade facilitation and digitalisation in reducing the cost and time associated with trade. In this context, India highlighted the need for simplified customs procedures, paperless trade and electronic exchange of documents, alongside stronger multimodal connectivity and reduced transit times.

India also called for greater co-operation among SCO member states to diversify and strengthen supply chains in strategic and emerging sectors, including agriculture, critical minerals, pharmaceuticals, manufacturing and electronics. The potential for enhanced co-operation in energy security, renewable energy and green hydrogen was also highlighted.

Recognising the importance of enabling smaller businesses to participate more effectively in regional and global trade, India underscored the role of digital payments, cross-border payments and accessible trade finance, particularly for Micro, Small and Medium Enterprises (MSMEs) and start-ups. India further called for greater participation of SCO economies in global value chains and reiterated its commitment to an open, inclusive and rules-based multilateral trading system, with the World Trade Organization (WTO) at its core.

The ministers adopted the Statement of the Ministers of the Shanghai Cooperation Organization Member States Responsible for Foreign Economic and Foreign Trade Activity.

The ministers agreed on the Action Plan for 2026-2030 for the Implementation of the Programme of Multilateral Trade and Economic Cooperation of the Shanghai Cooperation Organization Member States' for its further approval by the Council of Heads of Government (Prime Ministers) of the SCO Member States.

The ministers also approved the Regulations on the Special Working Group of the Shanghai Cooperation Organization Member States on the Development of the Creative Economy.

The ministers took note of the information provided by the representative of the SCO Business Council regarding the activities of the Council. They also took note of the information provided by the Tajik side on the work of the SCO Consortium of Economic Analytical Centres.

The ministers noted that the next ministerial meeting will be held in 2027 in the Republic of Uzbekistan.

MARITIME SECURITY: Union Minister for Defence, Rajnath Singh at the 2nd Indian Navy's Commanders' Conference, in New Delhi

Collective efforts vital to advance social justice for a sustainable future

AAT News Service

UNION Minister for Labour & Employment, Mansukh Mandaviya, called for collective efforts to place social justice at the heart of endeavours, in order to build a more inclusive, resilient and sustainable future. He was virtually addressing the Global Coalition for Social Justice Annual Forum. The forum brought together governments, employers' and workers' organisations, international and regional organisations, development institutions, the private sector, academia and civil society to strengthen co-operation and accelerate collective action for social justice and decent work.

The forum was graced by Mr Mandaviya and Youth Affairs & Sports, Gilbert F Houngbo, Director-General, International Labour Organization (ILO); Jacqueline Mugo, President, International Organisation of Employers; Luc Triangle, General Secretary, International Trade Union Confederation and Luiz Marinho, Minister of Labour and Employment, Brazil.

Sharing objective of the global community, Mr Mandaviya said, should be to translate co-operation into opportunities, growth into shared prosperity and commitments to social justice into tangible change. He said, India brings to the forum its experience of delivering transformation at scale and its commitment to building a more inclusive world of work. Emphasising the need for economic growth and social progress to move together, the minister said, growth must create decent jobs, technology must promote inclusion and innovation must contribute to improving people's lives.

India is preparing for the future of work through technology, skills and international co-operation. The changing world of work requires renewed focus on skills, employability and labour mobility. In this context, he highlighted India's partnership with the ILO to pilot an International Reference Classification of Occupations across India, Brazil and Germany to support smoother international mobility. He also referred to the New Delhi Declaration 2026 adopted under India's BRICS Presidency and the BRICS CONNECT initiative, as well as the consensus on an International Digital Platform for Remote Employment to create new virtual employment opportunities for youth across the Global South.

Highlighting India's reform-led approach, the minister said that the country continues to focus on transformative reforms, targetted welfare and digital innovation, ensuring that the benefits of economic growth reach the last mile.
